Solar Energy Expo is an event where industry leaders will present the latest technologies for generating electricity and innovative solutions in the renewable energy sector. The industry congress, an integral part of the fair, allows participants to update their knowledge, acquire new skills, and learn about the latest trends in the renewable energy industry.

At the heart of the ESIE is the presentation and promotion of the latest developments in the energy storage industry. The fair serves as a showcase for a wide range of products and services, including innovative energy storage technologies and materials, equipment and components for energy storage, advanced software solutions, and digital technologies.

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid operators, policymakers, utilities, energy buyers, service providers, consultancies and technology providers under one roof.
