Total volume of a cylinder shaped tank is the area, A, of the circular end times the length, l.  $A = \pi r^2$  where r is the radius which is equal to 1/2 the diameter or d/2. Therefore:  $V(\text{tank}) = \pi r^2 l$  Calculate the filled volume of a horizontal cylinder tank by first finding the area, A, of a circular segment and multiplying it by the length, l.

## 60-liter water storage tank
