Will Bosch make energy manager the central power hub for smart homes?

Bosch aims to make Energy Manager the central power hub for smart homes. Martin Weiss and his team are now working on a way to use solar power to recharge electric cars in the home garage. (assuming a four-person household with a 6-kWp PV system and 8-kWh battery storage).

How does Bosch manage energy needs?

Energy needs also fluctuate: depending on the weather, the natural light, and the time of day, energy consumption needs rise and fall. To balance these fluctuations out, Bosch has developed software solutions that make it possible to draw power from different, decentralized, and primarily renewable sources of energy and manage them centrally.

Are Bosch Home Comfort Products eco-friendly?

Energy efficiency and environmental protection are shaping our Bosch Home Comfort consumer and building products. Green technologies, such as Bosch tankless water heaters and geothermal systems are a few examples of Bosch innovations that reduce NOx and CO2 emissions.

How does Bosch's virtual power plant work?

To balance these fluctuations out, Bosch has developed software solutions that make it possible to draw power from different, decentralized, and primarily renewable sources of energy and manage them centrally. This creates a virtual power plant that makes energy available whenever it is needed.

What are Bosch fuel cells used for?

The Bosch fuel cells systems are already used in practical application in several pilot projects as a decentralized, efficient, and low-emission power generation solution. The strength lies in efficiency: Our power plant based on a solid oxide fuel cell (SOFC) has an electrical efficiency of about 60 percent at beginning of life.

Why should you choose Bosch Home Comfort?

Today, the Bosch Group is a leader in the development of next-generation technologies that deliver improved performance and efficiency while conserving our natural resources. Energy efficiency and environmental protection are shaping our Bosch Home Comfort consumer and building products.
