How can Egypt store electricity?

Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity stations to help store electricity for future use.

Is solar power a good investment in Egypt?

However, a noteworthy shift is on the horizon, with global investments in solar power expected to surpass those in oil for the first time in history this year. Egypt is blessed with an abundant solar resource, basking in an average of 9-11 hours of daily sunshine coupled with low humidity levels.

Can batteries solve Egypt's Electricity oversupply problem?

Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of new ways to tackle the issue.
