The SEC Cellyte CMTG series of VRLA Gel single cells builds on the Cellyte CMT platform, adding the benefit of true thixotropic gelled electrolyte to improve cycling capability. The resulting range is perfect for all extreme deep cycling applications. The range also incorporates SEC's industry leading CatVent catalyst technology as standard.

The SEC Cellyte ETG series of OPzV VRLA Tubular Gel single cells is a traditional design that complies with International DIN standards. The range is engineered with die cast tubular grids and gelled electrolyte which reduces the need for topping up and makes the product virtually maintenance free.

The SEC Monocell Solar series is manufactured with innovative module technology to offer an increased efficiency of 16.6%. Effective weak light performance and maximum durability in all conditions make the monocell an outstanding performer with a high energy yield. ...
