

# Cellyte FTA series AGM SEC Industrial Battery

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

What is the difference between cellyte TLG & VRLA AGM?

The classic range is a true industry workhorse, combining a proven VRLA AGM design with SEC's reputation for quality and dependability. The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids.

What is a microlyte MRT AGM battery?

The Microlyte MRT AGM battery is a premium product in the mainstream VRLA monobloc market. High tin plates mean a long float life product with a renowned cycling ability. Add in great high rate performance and you have a product that consistently outperforms all the competition.

What is the performance efficiency of cellyte TSG?

A performance efficiency of up to 16.6% combined with low whole system costs, give you an excellent price to performance ratio, and a fast return on investment. The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.

Industrial Battery Co. Ltd Type de Syst&#232;me de Stockage: AGM : Capacit&#233; Nominale: 175 Ah : R&#233;gion: Royaume-Uni ...

The SEC Cellyte TLA series of VRLA AGM monoblocs is a classic top terminal range, designed for when a cost effective but reliable solution is required. It has been engineered to offer competitive battery solutions combining superior gas recombination technology and great energy density and is well-proven with over 30 years of in application use ...

Cellyte FTA series (AGM) SEC Industrial Battery Co. Ltd Tecnologia Sistema di Accumulo: Piombo-Acido (AGM) Capacit&#224; Nominale: 175 Ah : Regione: Regno Unito Contatta il Produttore

Cellyte FTA series (AGM) Design Life >12 Years Voltage 12 Volts Capacity 45Ah to 175Ah. The Cellyte FTA Front Terminal range of valve regulated AGM batteries has been designed for applications where reliability and security are demanded. Perfect for telecom 19", 23" & ETSI racks and cabinets, the excellent high rate performance means it's ...

The CELLYTE FTA series Float life: 12-years in float service @ 30°C with an approved catalyst Cycles: 250 cycles @ 80% DOD at 25oC FTA The CELLYTE FTA is a market-leading, front terminal monobloc that was designed specifically for use in telecom, UPS or other string based, standby applications. The inclusion of the CatVent TM catalyst

1.1 CELLYTE 12FTA& G Battery, with Catalyst, Characteristics The CELLYTE 12FTA& G Front Terminal battery is a valve-regulated lead-acid recombinant battery designed for stationary applications. The 12FTA battery uses Absorbed Glass Mat (AGM) technology, 12FTG battery uses thixotropic Gelled electrolyte (Gel)

The SEC Cellyte TLAM series of VRLA AGM single cells is a premium range featuring heavy duty lead calcium plates. The long float life and excellent cycling make it the market leading range for all large capacity standby installations. The range also incorporates SEC's industry leading CatVent catalyst technology as standard.
