

Cellyte TLAM series AGM SEC Industrial Battery

What is the difference between cellyte TLG & VRLA AGM?

The classic range is a true industry workhorse, combining a proven VRLA AGM design with SEC's reputation for quality and dependability. The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids.

What is cellyte TSG?

The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required. The first-choice product for extreme renewable energy and semi-traction markets featuring true gel, SEC CatVent technology and thick high tin plates.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.

What is a microlyte MRT AGM battery?

The Microlyte MRT AGM battery is a premium product in the mainstream VRLA monobloc market. High tin plates mean a long float life product with a renowned cycling ability. Add in great high rate performance and you have a product that consistently outperforms all the competition.

Which AGM battery is best?

SEC battery has the best range of AGM batteries in the market. Absorbed glass mat batteries for electrolyte control in all conditions. The UPS was designed for high power applications. The additional installation of the CatVent (TM) catalyst in the cell headspace greatly enhances the lifespan of the battery.

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

The SEC Microlyte MP series of VRLA monoblocs are a classic top terminal range of AGM batteries. ... These AGM batteries provide a competitive battery solution that combines superior gas recombination technology and great energy density. Reliable, versatile and maintenance free - this is a difficult option to beat! ... Cellyte TLA series (AGM ...

The Cellyte TLAM is the market leading single cell VRLA AGM range. Combines excellent cycling, a durable long float life and multiple flexible racking solutions including seismic Zone 4 approved, making it a great choice for all large capacity installations.

The SEC Microlyte MRT AGM battery is a series of VRLA AGM mono bloc batteries suitable for a wide
range of uses. They're built on the Microlyte MP platform but with the addition of high tin plates. This has the
double benefit of both increasing life and improving battery cycling. Adding to the already impressive high
rate performance.
