

Cellyte TRA series OPzS Flooded SEC Industrial Battery

What is SEC cellyte TRA?

The SEC Cellyte TRA series of OPzS flooded tubular single cells is a traditional design that complies with International DIN standards. The range is engineered with die cast tubular grids and optimised pasted negative plates to produce an excellent float life, outstanding cycling capability and a very high operational reliability.

What is cellyte TRA?

CELLYTE TRA - excellent float life, outstanding cycle rate. The SEC Cellyte TRA series of OPzS flooded tubular single cells is a traditional design that complies with International DIN standards.

What is cellyte TSG?

The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required. The first-choice product for extreme renewable energy and semi-traction markets featuring true gel, SEC CatVent technology and thick high tin plates.

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

What is the performance efficiency of cellyte TSG?

A performance efficiency of up to 16.6% combined with low whole system costs, give you an excellent price to performance ratio, and a fast return on investment. The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.
