

Cellyte TUA series AGM SEC Industrial Battery

What is a cellyte CMT?

The Cellyte CMT is our flagship large capacity VRLA AGM range, with extra heavy duty high tin plates & CatVent technology. In production now for over 30 years, it is universally acclaimed as the No.1 battery for all high integrity, high specification standby systems.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

Which AGM battery is best?

SEC battery has the best range of AGM batteries in the market. Absorbed glass mat batteries for electrolyte control in all conditions. The UPS was designed for high power applications. The additional installation of the CatVent (TM) catalyst in the cell headspace greatly enhances the lifespan of the battery.

What is a microlyte MRT AGM battery?

The Microlyte MRT AGM battery is a premium product in the mainstream VRLA monobloc market. High tin plates mean a long float life product with a renowned cycling ability. Add in great high rate performance and you have a product that consistently outperforms all the competition.

What is the performance efficiency of cellyte TSG?

A performance efficiency of up to 16.6% combined with low whole system costs, give you an excellent price to performance ratio, and a fast return on investment. The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required.

The Microlyte MRT AGM battery is a premium product in the mainstream VRLA monobloc market. High tin plates mean a long float life product with a renowned cycling ability. ... The SEC Polycell Solar series is ideal for residential, commercial or utility solar projects. A performance efficiency of up to 16.6% combined with low whole system costs ...

The SEC Cellyte FTA series of VRLA AGM monoblocs has a compact footprint, excellent power density and a front terminal construction that is specifically designed to fit 19", 23" ETSI racks and cabinets. The design

Cellyte TUA series AGM SEC Industrial Battery

features extra heavy duty plates which make it a high reliability product suitable for all high integrity standby applications.

The SEC Microlyte MP series of VRLA monoblocs are a classic top terminal range of AGM batteries. ... These AGM batteries provide a competitive battery solution that combines superior gas recombination technology and great energy density. Reliable, versatile and maintenance free - this is a difficult option to beat! ... Cellyte TUA series (AGM ...

The SEC Cellyte TLAM series of VRLA AGM single cells is a premium range featuring heavy duty lead calcium plates. The long float life and excellent cycling make it the market leading range for all large capacity standby installations. The range also incorporates SEC's industry leading CatVent catalyst technology as standard.

The SEC Cellyte TSG series of VRLA Gel monoblocs builds on the Cellyte TUA platform utilising the same classic construction but incorporating both pure lead tin positive grids and true thixotropic gelled electrolyte to improve cycling capability. The resulting range is perfect for extreme cycling applications where daily deep cycles are required.
