

What is the investment threshold for energy storage in China?

At this stage, the investment threshold for energy storage to involvement in China's peaking auxiliary services is 0.1068 USD/kWh. In comparison, the current average peak and off-peak power price difference in China is approximately 0.0728-0.0873 USD/kWh.

Do deterministic and uncertain policies affect energy storage technology investment?

To compare deterministic and uncertain policies' incentive effect on energy storage technology investment, this study selects the average peak and off-peak power price difference for energy storage participation in peak regulation auxiliary services in some Chinese provinces as a reference standard in this study.

How does policy uncertainty affect energy storage technology investment in China?

Policy adjustment frequency and subsidy adjustment magnitude are considered. Technological innovation level can offset adverse effects of policy uncertainty. Current investment in energy storage technology without high economics in China. Subsidies of at least 0.169 yuan/kWh to trigger energy storage technology investment.

How big is China's energy storage capacity?

According to incomplete statistics from CNESA DataLink Global Energy Storage Database, by the end of June 2023, the cumulative installed capacity of electrical energy storage projects commissioned in China was 70.2GW, with a year-on-year increase of 44%.

What are the challenges facing energy storage technology investment in China?

Despite the Chinese government's introduction of a range of policies to motivate energy storage technology investment, the investment in this field in China still faces a multitude of challenges. The most critical challenge among them is the high level of policy uncertainty.

What is a continuous investment strategy for energy storage technologies?

For current energy storage technologies, the continuous strategy can significantly shorten the investment timing and enable investors to adopt the storage technology as early as possible; therefore, when new technologies are unavailable, the continuous investment strategy is the best choice.

The bidding volume of energy storage systems (including energy storage batteries and battery systems) was 33.8GWh, and the average bid price of two-hour energy storage systems (excluding users) was $\text{¥}1.33/\text{Wh}$, which was 14% lower than the average price level of last year and 25% lower than that of January this year.
