

Corrugated and Sandwich Roof Insertion System Novotegra

More information about the tile roof mounting system From roofing shingles to concrete roofing tiles: novotegra is perfect for every tile roof. It is quick and easy to fix, offers several individual solution options and is extremely stable and able to withstand stress.

The new novotegra green roof system is available* from now! The system offers solutions for a wide variety of green roofs and promotes biodiversity in addition to energy supply. In addition, green roofs help with the retention of rainwater, which relieves the burden on the sewage system.

Depending on the roof, novotegra gives you the choice between different mounting systems: a clamping system, in which the photovoltaic modules are fixed to the aluminium rails with module clamps, or an insertion system, in which the solar modules are laid floating and tension-free.

a flat roof. Facade systems must be mounted parallel to the facade. For roof-parallel installation with the clamping system, two module support rails per module must be mounted symmetrically under the modules for equal load transfer into the substructure. Alternatively, the roof-parallel installation can also be installed with insertion rails.
