Leading the pack is CATL with a 38.50% market share and a robust shipment volume of 50 GWh. The rankings show noteworthy changes in the industry landscape. As we approach the end of 2023, the energy storage industry is undergoing a ...

Many people see affordable storage as the missing link between intermittent renewable power, such as solar and wind, and 24/7 reliability. Utilities are intrigued by the potential for storage to meet other needs such as relieving congestion and smoothing out the variations in power that occur independent of renewable-energy generation.
