Parker was selected as the inverter supplier to two AES Energy Storage installations totaling 37.5 megawatts of energy storage capacity, the larger of which offers 30 MW of capacity at a 4-hour duration, making it the largest lithium ion battery-based energy storage installation worldwide.

The first step on the road to today"s Li-ion battery was the discovery of a new class of cathode materials, layered transition-metal oxides, such as Li_xCoO_2 , reported in 1980 by Goodenough and collaborators. 35 These layered materials intercalate Li at voltages in excess of 4 V, delivering higher voltage and energy density than TiS_2 . This higher energy density, ...
