FS DUO

The system is available with one (FS Uno Gen 3) or two supports (FS Duo Gen 3) and is intended to become the Schletter Group"s standard open space system in all of its markets. As for all other open-space systems, the Schletter Group can also provide the entire structural statics based on a geological survey. In addition, structural statics are ...

The "fail mode" determines whether users may or may not log into a protected application when the Duo cloud service is unreachable. If the "Bypass Duo authentication when offline" box is selected during installation, authentication attempts will fail open after primary authentication is successful if the Duo service cannot be contacted.
