6V Gel Battery 01611. Blitz batteries are high quality, maintenance free gel batteries with a cool vintage look. Because of low discharge and the high capacity of 16Ah, the electrical system of your classic motorcycle will be reliably supported. These batteries are very strong and durable and are great replacements for the original.

The typical charging voltage for a 12V gel battery is between 14.1V to 14.4V. This voltage range ensures that the battery is charged to its maximum capacity without overcharging, which can damage the battery. At what voltage is a 24V gel battery considered fully charged? A 24V gel battery is considered fully charged when its voltage reaches 28.8V.
