How to Install Ground Screw Solar Mounting System

sales@yuen-s 35 36 GL-1S Ground Screw Mounting GL-1S Ground Screw Mounting system designed to provide an economical and practical mounting solution for large-scale open areas. The design with U connector instead of front leg is more convenient and easier to finish the installation. It is an effective and cost-savings solution.

Install the ground screw by screw driver and leave 200mm height to the ground. Please make sure that all ground screws be aligned horizontally and vertically. Then fix the leg bases on flange type ground screws with M12 x 40 bolts, nuts, large flat washers and spring washers.

Yuens (Xiamen) New Material Co., Ltd. EVA GL-1S Ground Screw Mounting. PDF.

Yuens is excited to feature its GP-3C ground mounting system in a solar project in Brazil. Renowned for its easy installation, the GP-3C streamlines the setup process, saving time and effort on-site. Its component-optimized design ensures maximum efficiency and stability, while its cost-effective nature makes it an ideal choice for large-scale solar installations.

YUENS GP-2S GROUND MOUNTING ... Fastened with Ground Screw Anchored into Concrete Block. Module Frame Height. 25-50mm. Module Orientation. Portrait, Landscape. Tilt Angles. 0 - 60deg. Ground Clearance. ≤3000mm. Material. Aluminium EN AW-6005 T5 With 12-15um Anodization For Anti-Corrosion

Yuens is excited to showcase its 100 kW ground mounting solar project in Moldova, powered by the GP-2S system. The GP-2S is specially designed for extreme weather conditions and offers excellent acid resistance, ensuring long-term durability and stability. This robust system is ideal for large-scale installations, making it a perfect fit for Moldova's diverse environment, and ensures ...

The ground screw mounting system is a new preassembled ground mounting system. With patented and innovative support rack and rail design, standard components, highly preassembled clamps, not only the overall stability of the system can be ensured, but the installation can be even more easier finished.

Yuens is proud to showcase its solar project in Jordan, featuring the GP-2C ground mounting system. Engineered for stability and durability, the GP-2C is ideal for large-scale installations in open fields. With easy installation and robust design, this system ensures efficient energy generation, making it the perfect choice for harnessing solar power in Jordan's expansive ...
