The Republic of Panama and US midstream company Energy Transfer have signed a memorandum of understanding (MOU) to study the feasibility of a liquefied petroleum gas (LPG) pipeline project. The project, if it goes ahead, will expand Energy Transfer's international markets, and establish Panama as a global petroleum products distribution hub.

About 49% of the population of Haiti had access to electricity as of 2022. In rural areas, that number is closer to 2%, and while 80% of Haiti's urban areas have access to electricity, that access may not be reliable. "Even when a household is connected to the power grid, they might only have power for three to eight hours a day."

Winning bidders will need to have projects operational by 1 September 2026, for existing renewable projects and new solar PV plants. Offtake agreements will be completed depending on three different schemes based on power for new or existing renewable projects supported with energy storage, energy from new or existing renewable projects, or firm power ...
