What is a containerized battery energy storage system?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

How has energy storage been developed?

Energy storage first passed through a technical verification phaseduring the 12th Five-year Plan period, followed by a second phase of project demonstrations and promotion during the 13th Five-year Plan period. These phases have laid a solid foundation for the development of technologies and applications for large-scale development.

What is the leasing model for energy storage projects?

Another such model is the leasing model for front-of-the-meterenergy storage projects adopted by Hunan province in 2018, and the subsequent 2020 upgraded version of the leasing model which applied to energy storage paired with renewable generation and designed to split investment risks between each entity.
