

JIUWU HI-TECH has been delivering a full series of spiral membrane products with various molecular weights such as RO, UF, NF, MF through high-stability membranes combined with advanced automated production technology, which are widely used in the chemical industry, pharmaceutical industry, food industry, and water treatment, wastewater reuse.

Nanofiltration (NF) or nanofiltration membrane technology is a relatively recent ceramic membrane filtration system used most often with low total dissolved solids water such as surface water and fresh groundwater, with the purpose of softening (polyvalent cation removal) and removal of disinfection by-product precursors such as natural organic matter and synthetic ...

Jiuwu Hi-Tech manufactures a series of hollow fiber membrane, which can be operated in outside-in and inside-out direction. Hollow fiber membrane advantages include high filtration accuracy and packing density. Get regular and custom-made microfiltration and uf hollow fiber membrane price now!

JIUWU HI-TECH INTEGRATED MEMBRANE TECHNOLOGY SOLUTION -- JIANGSU JIUWU HI-TECH CO.,LTD CHINA-- J"ANosu J.uwu co..LT0 Address: No. 9 Yuansi Road, Pukou District, Nanjing, City, China 211808 ... a new energy-saving cleaner production technology. Advantages CASE 2 CANE& BEET SUGAR primary sugar high-quality sugar . edible syrup refined sugar ...

Maintenance Method for Microfiltration Membrane and Storage Method for UF Membrane Products ... Nanjing Private Economy Development Conference was held. Dang Jianbing, the chairman of Jiuwu Hi-Tech, attended the conference and won ... February 1, 2024 In recent years, the demand for energy-efficient technologies has been on the rise, fueled by ...

Enhancing the Energy Efficiency of Spiral Wound Membrane Modules Advancements in Flat Plate Membrane Technology for Wastewater Treatment ... in areas with a long history of garbage storage along urban water bodies, ... "JIUWU TIANHONG", a subsidiary of JIUWU HI-TECH, has developed a biological lake purifier and obtained related patents. ...

Ceramic membrane is a porous filter with fine pore size which is sintered from alumina or zirconia, titania oxide under high temperature. With an asymmetrical structure with porous support and the active membrane layer, the ceramic membrane is successfully used for primary brine purification.

Jiuwu High-tech & Nanjing Titanium: The Industrialization Project of Titanium Gypsum Constructio ... Enhancing the Energy Efficiency of Spiral Wound Membrane Modules Advancements in Flat Plate Membrane Technology for Wastewater Treatment ... Storage method of wet state UF membrane: The main point of storing the wet state UF membrane is to keep ...

Jiuwu high-tech energy storage

The technical indicators of membrane materials and the scale and automatic control of membrane equipment have reached the international advanced technology level. JIUWU HI-TECH is the largest membrane supplier in China. In the future, inorganic membranes will play an important role in gas separation and purification, and through the combination ...

What's New at JIUWU HI-TECH EN. English ... Maintenance Method for Microfiltration Membrane and Storage Method for UF Membrane Products Factors Affecting the Production Rate of UF Membrane ... the demand for energy-efficient technologies has been on the rise, fueled by the urgent need to combat climate change and reduce our carbon footprint ...

JIUWU ceramic membrane & organic membrane solutions for Food & Beverage: wine filtration, juice concentrate, flavoring and seasoning, and enzyme purification. Contact our advanced R& D team to design your unique ceramic membrane & organic membrane solution.

Jiuwu High-tech & Nanjing Titanium: The Industrialization Project of Titanium Gypsum Constructio ... Maintenance Method for Microfiltration Membrane and Storage Method for UF Membrane Products Factors Affecting the Production Rate of UF Membrane ... Enhancing the Energy Efficiency of Spiral Wound Membrane Modules Advancements in Flat Plate ...

Although this method has the advantages of high evaporation efficiency, under high temperature conditions, the flavor and color of the products are greatly lost, and the effective and nutritional components are also lost is difficult to maintain the original flavor and taste of the dairy product, the production cycle is long, and the energy ...

Jiuwu High-tech & Nanjing Titanium: The Industrialization Project of Titanium Gypsum Constructio ... Enhancing the Energy Efficiency of Spiral Wound Membrane Modules Advancements in Flat Plate Membrane Technology for Wastewater Treatment ... Storage Elements in the box should be stored in a dry, ventilated and clean storage. During storage ...

Introduction And Characteristics Of Membrane Separation Technology 2019-01-11 Membrane separation technology is widely welcomed by users because of its remarkable energy-saving effect, easy operation and maintenance, and simple control. Choosing the appropriate membrane separat...

CMP pilot machine is particularly suitable for scientific research institutes, universities, manufacturers, is the most effective helper for research and production personnel, and can solve the problems that old crafts and old equipment cannot solve and can be widely applied in the experimental research of extraction, cleaning and impurity treatment in pharmaceutical and ...

Company News . JIUWU HI-TECH Wish You Merry Christmas 22 2020.12 DETAILS; The science and technology association of JIUWU HI-TECH officially was inaugurated 24 2020.07 On July 22, 2020, the

Jiuwu high-tech energy storage

inaugural meeting of Jiangsu Jiuwu High-Tech Co., Ltd. Science and Technology Association (hereinafter referred to as JIUWU HI-TECH Association) was held in the ...

By employing advanced materials and innovative module configurations, Jiuwu ensures that their spiral wound membrane modules achieve high recovery rates, minimizing waste and optimizing energy usage. Jiuwu's modules are designed to operate at low pressures, resulting in reduced energy requirements and operational costs.

Jiuwu High-tech & Nanjing Titanium: The Industrialization Project of Titanium Gypsum Constructio ... Maintenance Method for Microfiltration Membrane and Storage Method for UF Membrane Products Factors Affecting the Production Rate of UF Membrane ... Energy Consumption: MBBR systems typically require less energy compared to MBR systems because ...

Jiuwu High-tech & Nanjing Titanium: The Industrialization Project of Titanium Gypsum Constructio ... Maintenance Method for Microfiltration Membrane and Storage Method for UF Membrane Products Factors Affecting the Production Rate of UF Membrane ... Because membrane filtration technology has the advantages of high separation efficiency, energy ...

Industry News. JIANGSU JIUWU HI-TECH CO. LTD. (Referred to as " JIUWU HI-TECH ") was founded in 1997. In 2017, JIUWU HI-TECH was listed on the Shenzhen Stock Exchange (stock code: 300631). They have become the largest ceramic membrane manufacturer in the World. JIUWU HI-TECH has many unique membrane applications and more than 50 Patents ...
