

What temperature should a lithium battery be stored?

Proper storage of lithium batteries is crucial for preserving their performance and extending their lifespan. When not in use, experts recommend storing lithium batteries within a temperature range of  $-20^{\circ}\text{C}$  to  $25^{\circ}\text{C}$  ( $-4^{\circ}\text{F}$  to  $77^{\circ}\text{F}$ ). Storing batteries within this range helps maintain their capacity and minimizes self-discharge rates.
