545W Output: These panels have an impressive power output of 545 watts, which is significantly higher than conventional solar panels. This means they can generate more electricity from the same amount of sunlight, making them more efficient. **Bifacial:** The panels are bifacial, which means they can capture sunlight from both the front and back sides. . This ...

LONGi R& D Centers. LONGi has three R& D centers for wafers, cells, and modules and certified as national enterprise technology centers. We have established strategic partnerships with research institutes such as the University of New South Wales and the State Key Laboratory of Silicon Materials of Zhejiang University to strengthen cooperation and promote technology ...

Adhering to its "3+1" technological innovation concept, encompassing producing, developing, researching and exploring new generation of technologies, LONGi improved its technological innovation system, boosted digital and smart transformation, standardized innovation management operations, strengthened intellectual property management, and accelerated the ...

LONGi's residential solutions team focuses on optimized system user design, maximizing the utilization of roof area through the thoughtful design and layout of the PV system. Award-winning Modules LONGi modules have won the "All Quality Matters Award -Outdoor Energy Yield" as well as RETC's "High Achievers" awards for three consecutive years.

Withstand up to 55mm hailstone and 17X impact energy compared to IEC standard 25mm hail test. Optimized Electrical Parameters . The working current is about 13A, which is perfectly adapted to mainstream string inverters. ... For which applications is LONGi's Hi-MO 5 Ice-Shield module most suitable?

LONGi PARK standard design parameters The W-type optical storage LSC-W-XX-C LONGi Hi-MO4 efficient two-sided half-chip component Multiple route MPPT group serial inverter Mobile APP or PC cloud monitoring 6005-T6 high-strength aluminum alloy 25-year design life Energy storage system can be selected according to customer requirements

LONGi has announced that it has established new cell efficiency world records of 26.56% for a p-type HJT cell and 26.09% for an indium-free HJT cell, based on an M6 full-size mono-crystalline silicon wafer and its self-developed mass production process, the results certified by Germany's Hamelin Solar Energy Research

Longi's energy storage layout

Institute (ISFH).

As an expert in the new energy industry, Mr. Li's in-depth research and innovative achievements in photovoltaics and energy storage have provided crucial support for the company's development in renewable energy and energy storage technologies. Lu Yi ---- Independent Non-Executive Director; Lu Yi is a doctoral tutor of Tsinghua University.

At this conference, LONGi officially launched Hi-MO X6 Max series products, which is also the first large-scale switching of LONGi's rectangular wafer-based products following the agreement reached by nine companies on July 7, 2023 on the module size standard and by six companies on August 8, 2023 on the wafer size (wafer size: 182.2×191.6mm ...

Geneva, Switzerland, December 13, 2023-On the 13th, the second Global Refugee Forum (GRF) commenced in Geneva, Switzerland, bringing together 168 government delegations, including five heads of state and 86 at the ministerial level and above. LONGi participated in this influential forum in the wake of forging a global partnership with UNHCR, ...

Tamil Nadu, May 2024- The Indian textile industry, a cornerstone of the nation's economy, is taking a giant leap towards a greener future. A textile manufacturer in Coimbatore, Tamil Nadu has recently installed a solar power plant featuring LONGi's high-efficiency Hi-MO 5 solar modules. The project, carried out by the esteemed EPC firm Viridis Engineering, is already ...

LONGi Module Design and Planning High Optical Utilization. Bifacial power generation. Innovative optical structure ... energy storage, starts using solar in manufacturing Solar becomes the main electricity source ... It is LONGi's vision and roadmap that Earth will be completely green and

Shanghai, China- June 14 th - On June 14th, at the highly anticipated 2024 SNEC Expo in Shanghai, LONGi Green Energy Technology Co., Ltd. (hereinafter referred to as "LONGi ") announced a major breakthrough in the development of its silicon-perovskite tandem solar cells.. According to authoritative certification by the European Solar Test Installation ...

More than 700 exhibitors will showcase their products in the renewable energy industry and energy efficiency, storage, and the newly added Hydrogen segment. ... LONGi began to establish its global layout in the hydrogen business in 2021, focusing on large-scale alkaline electrolysis equipment, and at the same time deployed the green "power ...

LONGi Green Energy's 2023 annual report shows that the company is actively expanding its overseas capacity layout, with the 2.8GW module project in Malaysia and the 3.35GW cell project in Vietnam being put into operation on schedule, and the construction of the 6.6GW silicon rod project in Malaysia is progressing orderly.

Longi s energy storage layout

LONGi follows the 14th Five-Year Plan for Green Industrial Development, the 14th Five Year Plan for Circular Economy Development and the EU's A New Circular Economy Action Plan and other relevant policies and initiatives at home and abroad, adheres to the product design concept of minimizing environmental impact, and prioritizes energy saving and environmental protection ...

October 23rd, 2024 - LONGi Green Energy Technology (Hereinafter referred to as LONGi) officially announced a new world record for crystalline silicon module efficiency. According to the latest certification report from the Fraunhofer Institute for Solar Energy Systems ISE in Germany, the efficiency of the HPBC 2.0 module independently developed by LONGi has reached ...

LONGi R& D Centres. LONGi has three R& D centers for wafers, cells, and modules and certified as national enterprise technology centers. We have established strategic partnerships with research institutes such as the University of New South Wales and the State Key Laboratory of Silicon Materials of Zhejiang University to strengthen cooperation and promote technology ...

Algeria, Jul 3rd, 2024 -- On July 3 2024, the roundtable forum on "LONGi's Advanced Green Power + Green Hydrogen Solutions for Algeria" was successfully held in Algiers. The forum brought together key government agencies involved in the renewable energy sector and several project implementation companies to discuss the impact of technological innovation and high ...
