These special boxes are great at controlling &quot;extra energy.&quot; They have smart systems inside that adjust the extra energy just right to keep things balanced. This careful adjustment saves energy and stops from jumping around, so the whole electricity system works smoothly without wasting any power.

Place the cabinet near an exit so it can be easily moved outside in case of a fire. Purpose-built lithium-ion battery storage cabinets are heavy, around 500 kg, so ensure your cabinet has an integrated base to allow evacuation with a forklift. This is crucial both in case of a fire and if the cabinet needs to be relocated for other reasons.
