In order to keep high efficiency of whole system, please use all matching pumps from Gol Pumps New Energy. We take three phase AC submersible pumps as example, for solar pumping system configuration.

S6-GR1P(0.7-3.6)K-M series inverter is designed for residential PV plants. The maximum input current per string is 14A, which is compatible with high-efficiency modules and bi-facial modules. Compact and lightweight design, make it easy to install. Fanless design, lower noise, brings you a comfortable living environment. Integrated AFCI function can proactively reduce the risk of fire.

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$8,310 for a 3-kilowatt solar system). That means the total cost for a 3,000-watt (3kW) solar system would be \$6,149 after the federal solar tax credit discount (not factoring in any additional state rebates or incentives).. 3kW solar system cost: What are solar shoppers paying in your ...

These features ensure that the A-MS can absorb more solar power and make it one of the most productive inverters on the American residential market. With 150% DC input oversizing capability, the A-MS allows end-users to significantly expand the solar array and drive increased power output even under low solar radiation.
