

AIKO - Datasheet for Mono 182-10BB-160F Bifacial PERC - Free download as PDF File (.pdf), Text File (.txt) or read online for free. The document provides specifications for a bifacial PERC solar cell, including its appearance, dimensions, material number, thickness, coatings, busbar configuration, electrical performance parameters, I-V curves, temperature coefficients, and ...

10BB M10 (MONO PERC) 10BB 182 Mono Bifacial Solar Cell Technical Data and Design Dimension
182*182*0.5mm Thickness 175*30mm Front (-) 10*0.1mm*0.03mm busbars,160fingers
Back (+) 1.4*0.3mm,10*6 silver soldering pads,180 fingers 800 Light Intensity dependence
Intensity(W/m²) Voc Isc

Bifacial PERC Cell P-PERC-182-10BB Product Characteristics High conversion efficiency with high reliability No light-induced degradation Uniform cell performance with stable process control Both sides can generate electricity Low mismatch of cell performance during encapsulation Excellent power generation performance under low irradiation

150 Watt Zonnepaneel PERC 10BB Monokristal 182*182 mm . PERC-celtechnologie, dankzij de passivering aan de achterzijde kan een PERC-module meer gebruik maken van rood zonlicht en neemt de efficiëntie van de module toe met maximaal 1%. Vooral bij weinig of diffuus licht in de ochtend- of avonden kunnen PERC-modules betere prestaties leveren ...

MONO 10BB Half-Cut Module PERC Module Product warranty on materials and workmanship Linear power output warranty years years Half-Cut technique leads to increased power output Compared with the whole cell, the current of half cell is halved, the heat loss is reduced, the hot spot temperature is reduced, and the power can be effectively increased.
