

Recommendation of energy storage desk lamp

How much energy does a desk lamp use?

Depending on how often you use your desk lamp, you may want to consider wattage as you shop, which is a measure of how much energy the appliance uses. The good news is that LED lamps use significantly less energy than incandescent bulbs--while most standard bulbs are around 60 watts, LEDs are generally 15 watts or less.

Which led desk lamp should I buy?

Our top choice is the BenQ e-Reading LED Desk Lamp, which is highly adjustable and tall enough to use with desktop computers. For a more budget-friendly choice, the IKEA FORSÅ Work Lamp costs just \$28 and has a wide range of motion and sturdy design, but you will need to purchase a light bulb separately.

How to choose a good desk lamp?

Today's market offers a wide range of desk lamps, many featuring long-lasting LED bulbs with multiple brightness settings and color temperatures to suit various needs. Experts recommend choosing an adjustable lamp that can be easily repositioned to meet different tasks.

What is the best eReading desk lamp?

1. BenQ e-Reading Desk Lamp The BenQ eReading LED Desk Lamp is the best lamp because of the level of customization it offers. You can adjust how cool or warm you want the tone, depending on if you're trying to concentrate at work or reading a book.

How long does a desk lamp last?

This desk lamp features an antique brass finish with an integrated LED bulb rated to last up to 25,000 hours. The lamp delivers 400 lumens of brightness with a soft white hue to help you stay on top of the tasks you're working on. As a contract-grade product, this lamp is durable enough for commercial use.

How far should a desk lamp be from a work area?

As a rule of thumb, the ideal distance is 15 to 36 inches away from your work area. However, you find desk lamps with adjustable arms so you can get the suitable height. Additionally, if you are a right-handed person, place the desk lamp on your left side and vice versa if you are a left-handed person.
