4. Ruitong Song, Hong Li, Hongzhi Zhang, Huan Tang, Xiangkai Tang, Jun Yang, Heyun Zhao, Jing Zhu*, Tunable luminescence and improved thermostability via Tm-Dy energy transfer in a tellurooxyphosphate phosphor, Applied Materials Today, 30, 101712, 2023. 3.

Xin Pang, Dengfeng Li, Jing Zhu, Jingliang Cheng, Gang Liu PDF A Review on Nano-Based Drug Delivery System for Cancer Chemoimmunotherapy Jul 5, 2020 ... 3D Printing of NiCoP/Ti₃C₂ MXene Architectures for Energy Storage Devices with High Areal and Volumetric Energy Density Jul 9, 2020. 143 . Lianghao Yu, Weiping Li, Chaohui Wei, Qifeng Yang ...

Electrochemical energy storage is a promising route to relieve the increasing energy and environment crises, owing to its high efficiency and environmentally friendly nature. However, it is still challenging to realize its widespread application because of unsatisfactory electrode materials, with either high cost or poor activity and new ...

Similar concept was proposed in [99, 100], where banks of varied energy storage elements and battery types were used with a global charge allocation algorithm that controls the power flow between the storage banks. With careful usage of power electronic converters, configurable and modular HESS could be one of the future trends in the ...

Jinhyuk Lee, Daiwei Yu, Zhi Zhu, Xiahui Yao, Chao Wang, Yanhao Dong, Rahul Malik and Ju Li, ACS Applied Energy Materials 3 (2020) 7931-7943. Giant Photonic Response of Mexican-Hat Topological Semiconductors for Mid-infrared to Terahertz Applications, Haowei Xu, Jian Zhou, Hua Wang and Ju Li, Journal of Physical Chemistry Letters 11 (2020) ...

Among these technologies, thermal energy storage (TES) has a significant role to play in future zero-carbon energy systems due to the following reasons: 1) ... Zhu Jiang is an associate professor at Southeast University, with more than 8 years of R& D experiences in thermal energy storage (TES) technology. Her research

interests include ...

Zinc-air batteries deliver great potential as emerging energy storage systems but suffer from sluggish kinetics of the cathode oxygen redox reactions that render unsatisfactory cycling lifespan. The exploration on bifunctional electrocatalysts for oxygen reduction and evolution constitutes a key solution, where rational design strategies to ...

The vanadium flow battery (VFB) as one kind of energy storage technique that has enormous impact on the stabilization and smooth output of renewable energy. Key materials like membranes, electrode, and electrolytes will finally determine the performance of VFBs. In this Perspective, we report on the current understanding of VFBs from materials to stacks, ...

Dielectric capacitors own great potential in next-generation energy storage devices for their fast charge-discharge time, while low energy storage capacity limi ... Jiaqi Liu, Hansong Wei, Kang Du, Hongmei Jing, Ye Tian, Yongping Pu; Achieving ultrahigh energy storage density in super relaxor BCZT-based lead-free capacitors ... Zhu, J. Hong, J ...

AgNbO₃-based antiferroelectric materials have attracted extensive attention in energy storage due to their double polarization-electric field hysteresis loops, but they always suffer from low breakdown strength (E_b)
lms with few defects and small thickness exhibit high breakdown strength, which helps to improve energy storage performance. In the present work, an AgNbO₃ ...
