

Total energy storage in Lebanon

How many terawatts a day does Lebanese electricity use?

Frequent power outages are part and parcel of the daily life of the Lebanese public. The percentage of electricity demand unmet by Électricité du Liban (EDL) has increased from 22% in 2008 to 37% in 2018, totalling around 8.1 terawatt-hours (TWh).

Can big data help Lebanese energy planning & strategy?

Although the concept of big data might sound alien in the Lebanese context, given the existing challenges faced by the sector and EDL, utilizing big data analytics can be a powerful tool to transition Lebanon into the next phase of its energy planning and strategy.

Do distributed renewables affect Lebanon's economy?

However, the economic impact of distributed renewables should be measured based on unsubsidized cost estimates that are reflective of their real cost on Lebanon's economy. Furthermore, the sustainability of the NEEREA mechanism is under pressure given the escalating fiscal crisis in Lebanon.
