

Two Column Double Carport Structures

What is a double carport?

Double carports or double-wide carports are metal carport shelters that are designed to cover two cars, trucks, or other types of vehicles. As a general rule, most carport manufacturers in the United States refer to their standard 18' wide to 24' wide units as double carports or 2-car carports.

What is a 2 column carport?

Two column flat style carports are configured using (2) columns per bay or "two car spaces" and have a slightly pitched roof to shed rain and snow. 16 GA. Cold Rolled G-90 Galvanized Steel 29 GA. Roll Formed Galvanized Steel

What is a 2 car carport?

2 car carports or double carports are metal shelters that are designed to cover two vehicles (cars, trucks, etc.). Our double-wide carports are built with galvanized, rust-proof steel for great durability and long-lasting protection for small vehicles. Browse our wide range of 2 car carports here. Not Able to Find the Best One for You?

Why are two car carports so popular?

Two car carports are steadily gaining popularity in the United States due to their durability, reliability, and multi-functionality. It goes without saying that two car carports provide some of the most versatile storage and protection options in the metal building industry.

How wide should a metal carport be?

Most double carports have a standard length of 21', but you'll have to decide how wide your metal carport needs to be based on the vehicles you plan to house. To cover two smaller cars, we recommend double carport dimensions of at least 20'x21'.

What is a steel-built carport?

A steel-built carport is a cost-effective, durable solution to protecting cars, trucks, vans, RVs, or other vehicles from the elements. GenSteel has been supplying high-quality, pre-kitted steel carports for more than 30 years, and in that time, we've refined our designs to arrive at the ideal 2-car carport. Steel-built carports from GenSteel are a cost-effective and durable option for sheltering your vehicles.
