

Ultra Rail Roof Mount System SnapNRack

What is a SnapNRack ultra rail roof mount?

The SnapNRack Ultra Rail Roof Mount portfolio satisfies virtually all residential roof types featuring labor saving components like the snap-in mounts and splices along with the open rail channel and accessories to create the industry's leading Wire Management Solutions.

How do I mount solar panels on a roof?

Simple, lightweight solar PV mounting system for just about any roof. SnapNRack's Ultra Rail is a sleek, lightweight rail solution for mounting solar modules on just about any roof. The entire system is a snap to install utilizing new Ultra Rail Mounts that include snap-in brackets for attaching rail.

What is a SnapNRack roof solar panel mounting system?

The SnapNRack line of roof solar mounting systems is designed to reduce total installation costs. This standing seam metal roof solar panel mounting system features technical innovations proven on more than 350 MW of solar projects to simplify installation and reduce costs.

What is SnapNRack RL universal mounting system?

The Fastest Mounting System. Period. SnapNRack RL Universal Mounting System is designed to provide the fastest, most intuitive install experience on the roof. The direct mount system features four basic components, with nothing larger than the size of a PV module, resulting in easy material management.

Are ultra rail mounts compatible with all existing clamps?

The entire system is a snap to install utilizing new Ultra Rail Mounts that include snap-in brackets for attaching rail. Compatibility with all existing module clamps maintains the same intuitive install experience installers know and love.

What is ultra rail?

Ultra Rail now features one rail profile, UR-45, a lightweight rail profile that's suited for all geographic regions, with varying span capabilities. UR-45 Rail maintains all the great features of SnapNRack rail like snap-in module clamps and an open rail channel for integrated wire management.
